## BIG Search

BIG Search is a scalable text search engine built based on ElasticSearch (a highly scalable open-source full-text search and analytics engine based on Apache Lucene). It features cross-domain search and facilitates users to gain access to a wide range of biomedical data, not only from BIGD databases but also partner databases throughout the world.

### BioProject: 2019-nCoV

- Accession: PRJCA002185
- Title: 2019-nCoV
- Description: 2019 novel coronavirus genome sequences in Hangzhou
- Samples: [SAMC133663](#)
- BasicInfo : PRJCA002185; Whole genome sequencing; Evolution
